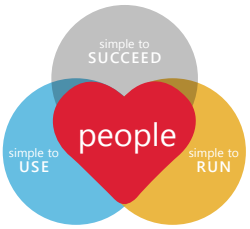
SAP® SUCCESSFACTORS®

FastTrack Implementation

GP STRATEGIES®

FastTrack - Low Risk, High Quality, Short Time



Are you worried about high implementation costs?

Do you want a turnkey solution based on proven best practices?

Are you already using Employee Central and want a simple Recruiting Management solution?

Are you looking for a pilot before a larger roll-out?

Then let GP Strategies® help you get up and running in weeks with a low-risk, fixed-price project based on SAP SuccessFactors Leading Practices and GP Strategies solid experience.

At GP Strategies, we understand that some companies are reluctant to implement new modules because of the costs. Often business requirements do not require an enterprise implementation approach in which all configuration parameters are in play, but rather can be solved based on proven best practices. Our SuccessFactors FastTrack implementation approach built on SAP Leading Practices and Rapid Deployment Solutions (RDS) enables you to rely on the benefits of good practices, short implementation time, low risk, and high quality.

Who should consider a FastTrack implementation approach?

The award-winning FastTrack implementation approach is offered for selected SuccessFactors modules as an alternative to the more comprehensive Enterprise Implementation approach, which is appropriate for more complex requirements. With a FastTrack implementation we reduce configuration decisions by 90% and focus more on application education and go-live activities. FastTrack goes beyond SAP RDS: it is simpler to get up and running, it is based on 14 years of experience, and it can be applied in any SuccessFactors environment in any sequence.

What does FastTrack contain?

The implementation delivers a turnkey solution, configured with both test and production system setup, configuration workbooks, and end user quick guides. FastTrack can be used for pilots, small/medium companies, and phase one of larger roll-outs.

We deliver a full package, including:

- Setup and Best Practice Preconfiguration (test and production)
- Configuration workbooks for ongoing system maintenance
- Branding, emails, and authorizations/ permissions as needed
- Ready to use end user quick guides
- Standard reports and analytics delivered to function
- Effective training and customer enablement, including hypercare

SAP SuccessFactors

The FastTrack enables you to achieve maximum benefit of your investment in a very short time frame. The implementation will allow you to immediately derive value from SuccessFactors. If speed to value and impact are key drivers for a customer's success, then GP Strategies FastTrack is the choice for you.

With GP Strategies FastTrack, we deliver a fixed-fee, fixed-scope, low-risk implementation in weeks—not months. The delivery follows the standard delivery model defined by GP Strategies, which is based on SAP Activate for cloud as well as SAP RDS.

GP Strategies FastTrack is available for the following end-to-end solutions:

(A) Employee Central

(B) Employee Central + Recruitment Management

(C) Employee Central + Goal and Performance Management + Compensation Management

(D) Any combination above + Workforce Analytics on HANA

The FastTrack solution will be implemented as one project in one rapid timeline and will feature a fully functional end-to-end solution supporting your core people processes. With WFA, you also get a deep understanding of your employee demographics. Additional features can be added at a later stage such as Succession and Development, Learning, and Onboarding.
