SAP Process Automation That Finally Delivers on the Promise of Self-Services

Designed with the end user in mind, Mana delivers an experience of ease and user-friendly technology. Mana is created on an HTML5 platform with responsive technology, smart dropdown menus, and the ability to access the portal on any device at any time.

The best part? You don’t have to understand SAP to use it. Mana works with SAP in the background so that it does all of the work, not you. You will be able to send requests, fill out forms, and complete processes in the most efficient and effective way possible.

Tired of hearing the following from your end users?

- Where do I go to start this process?
- I think I submitted a transaction; did it go into a black hole?
- What do these SAP terms (e.g., Personnel Area and Subarea) mean?
- Do I have to have a vacant position before I can promote someone?
- This web form feels like it was built in 1990. Why is there a scroll bar inside of a scroll bar?
Key Benefits

Productivity and End User Satisfaction
Mana is a complete solution with all the bells and whistles your users expect from a modern web application. HTML5 responsive technology allows this portal to be accessed from any device at any time.

Data Accuracy
Because Mana simply uses your existing SAP ECC configuration, you are able to provide data validation and “smart” dropdown menus, ensuring data accuracy. Fewer mistakes result in cost savings related to retroactive transactions, payroll inaccuracies, and data entry corrections.

Process Transparency
You can now track the progress of your request and see exactly where it is and who is working on it. Because there is no paperwork, everything moves faster and more efficiently.

Native SAP/No Additional IT Footprint
Mana uses the standard framework for SAP Processes and Forms, including SAP Workflow. Implementation is easy and configuration driven with limited coding, to free up time and cost of your valuable IT resources. Best of all, your IT organization can easily understand and support the solution.

Other Benefits

- Audit/Compliance
- Elimination of Paper
- Process Simplicity

Based on over 10 years of automating HR processes across a global customer base, Mana offers a full process library that will have you up and running ASAP.

Process Library Includes:
- Intuitive Launchpad
- Position Profile & Request
- Job Profile & Request
- Org Unit Profile & Request
- Transfers, Promotions, Other Changes
- Leave of Absence
- Separations
- Job Catalog Visualization
