

A Powerful Resource for Technical INSTITUTIONS

Organizations committed to vocational education are constantly balancing the ever-increasing skill needs of technical industries with the training demands to supply those skills. GP Strategies® excels at helping institutions offer more without the upkeep. Through GP Strategies, organizations can offer single training sessions while maintaining fully robust programs and resources.

Supplement Your Technical Training Programs for Local Workforces

How is this possible? Technical colleges can leverage our programs, equipment, experienced instructors, and educational tools for student use. They are available to rapidly integrate into new and existing programs and are customizable for any training program needs.

This gives technical colleges the ability to quickly expand training capabilities, courseware offerings, and instructor pools, while lowering operating costs and adding flexibility. Essentially, GP Strategies can bridge the gap between technical colleges and local commercial workforce development needs, helping to significantly increase training output and ensuring a healthy and profitable business.

**Real
World
Impact**

Our training programs and tools work, and we have the measurable impact to prove it. At a multinational food and beverage company with over 107,000 employees, Overall Equipment Effectiveness (OEE) increased from 86.2% to 98.8% in a six-month time span after implementing GP Strategies' training programs.

Take Advantage of Grant and Public Funding Options

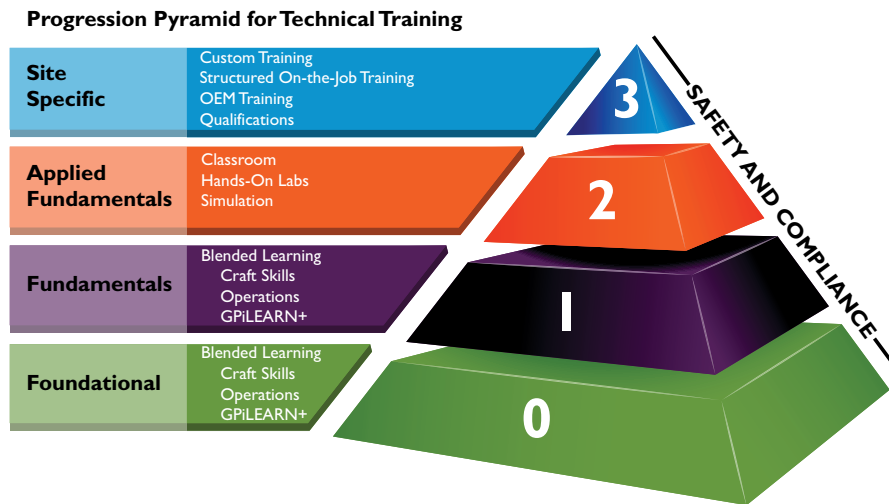

Q Interested in one of our offerings but worried about the funding? No problem! We work with organizations countrywide, including state, federal, and local workforce development entities—both nonprofit and for-profit.

GP Strategies can partner with local and state technical colleges that can act as an agent to access federal and state grants for workforce development training.

Access a Library of Training, Equipment, and Resources Available As-Needed

Available for immediate use, GP Strategies' courseware, workshops, and experienced instructors offer a wide range of resources to expand and empower any curriculum.

- [Craft Skills](#) pre-built and customizable courseware offered through our progression pyramid for technical training
