

KNOWLEDGE Alternative fueling station engineering design, permitting, and construction services

PERFORMANCE Providing infrastructure to support the expanding natural gas fleet

IMPACT Designed and built over **80** alternative fueling stations in the US and Canada since **1999**

When a leading package delivery company needed two alternative fueling stations to support their eco-friendly goals, GP Strategies® had the experience and knowledge needed to get the job done.

■ Fueling a fleet—and the future of alternative energy.

Package delivery is a sophisticated and complex industry with lots of moving parts. Literally. So when one of the industry's most recognizable brands wanted to add over 1,000 LNG-powered trucks to their fleet, they turned to GP Strategies.

Having designed and constructed over 80 alternative fueling stations in the US and Canada since 1999, we are a recognized expert in the field. We implement our own LNG dispenser into the station design, which is less expensive and more efficient than other models available on the market. In fact, we are among the first in our industry to offer a two-hose pump, enabling the fueling of more than one vehicle at a time.

We delivered the required stations to the client on time, handling everything from the initial needs assessment through engineering, design, permitting, and construction. As you might imagine, efficiency is key when it comes to package delivery. The client was so impressed with our time-saving station design, timely delivery, flexibility, and attention to their unique needs on this project that we were asked to construct an additional eleven stations.

The result is station designs that maximize the space available and allow for more efficient methods of fueling vehicles. We also saved the client significant dollars on the project while helping them further their mission of expanding their natural gas fleet and increase the ROI of the project overall.

Alternative Fuel Technical and Engineering Solutions

- Maintenance Solutions
- Construction Services
- Station Training
- LNG Dispensers

Our Services

GP Strategies works with leading global organizations in both the public and private sectors to deliver high-impact training, consulting and performance improvement solutions. We partner closely with individuals and teams across those organizations to deliver everything from leadership development programs and sales solutions to learning technologies and performance-based engineering solutions.

While our services are diverse and comprehensive, all are built on a foundation of human performance improvement with emphasis on time- and money-saving benefits that last long after our work is done.

Making a Meaningful Impact

We are at our best when we're helping our clients achieve their best. GP Strategies' passion is to make a meaningful impact by helping you:

- Create leaders that drive performance at all levels
- Sell more... faster
- Deliver efficient and sustainable energy
- Ensure safe products
- Develop effective practices and work environments
- Prepare communities and organizations to mitigate risks
- Achieve results in complex regulatory arenas
- Empower people to reach their highest potential
- Improve performance across the globe
