COURSE DESCRIPTION:

Participants will learn how to develop an effective APM program utilizing new methods, techniques, and best practices. They'll also learn about the most critical aspects of asset management.

COURSE HIGHLIGHTS:

The 1-day Introduction to APM workshop allows participants the opportunity to experience an educational session in which the instructor will:

- Identify the key elements of an APM program
- Clarify the importance of asset and integrity assurance
- Explain the benefits of an asset management strategy
- Present key enablers to ensure long-term stability
- Review case studies and best practices of organizations that have implemented successful programs at their facilities

WHO SHOULD ATTEND:

This course is designed for asset managers, maintenance and reliability managers, operations, engineering, and those directly involved in the daily operation of asset-intensive organizations.

INSTRUCTORS:

GP Strategies instructors bring over 40 years of hands-on experience. They are certified maintenance and reliability professionals (CMRP) and certified reliability leaders (CRL) and are active members of the Society for Maintenance & Reliability (SMRP) and the Association of Asset Management Professionals (AMP). They understand your problems and the environment you work in.

TAKE HOME MATERIALS INCLUDE:

- Tools to draft a business case for APM implementation
- APM roadmap planning and key benefits
- APM self-assessment matrix to help with APM improvements
- Outline for potential areas of improvement in your organization
