

Navigate FEMA's Grants Portal Effectively With GP Strategies' Financial Recovery Support Services

UNDERSTAND AND MAXIMIZE YOUR REIMBURSEMENT

Amidst the COVID-19 pandemic, those seeking emergency management relief may find it challenging to navigate FEMA's Grants Portal.

- What funding is available?
- How quickly can I get reimbursement?
- What information is critical to maximizing reimbursement for my business or public institution?

GP Strategies' disaster recovery experts and our Virtual Recovery Office (VRO) can help you better understand what reimbursements are available so you can maximize your access to appropriate funding and avoid duplication of benefits and potential de-obligation risk based on five critical areas.

— GRANTS PORTAL KNOWLEDGE BASE

Efficiently navigate, request information, submit information, run reports, and set up dashboards.

— ESSENTIAL ELEMENTS OF INFORMATION

Accurately answer the essential elements of information (EEI) questions in a manner that maximizes eligibility. Additionally, we can help you submit the required documentation for each EEI.

— EXPEDITED PROJECT WORKSHEET

Forecast anticipated costs through the incident period of the event and present to FEMA for an Expedited Project Worksheet (50% advance).

— MANAGE AND MAINTAIN DOCUMENTATION

Successfully package expenses and supporting documentation and include with procurement and eligibility determinations in advance of anticipated audits and close-out.

— EXPEDITE REIMBURSEMENT

Effectively package documentation for state emergency management agencies and streamline the reimbursement process.

We've been helping organizations recover from disasters for over 15 years. Let us be your partner during this time of need.
