

# Regulatory & Compliance Services for Technical Industries

---

Build a culture of compliance - from the boardroom to the shop floor

Today's organizations are operating in an increasingly complex, competitive, and global environment.

Meeting regulatory and compliance standards is critical to running an effective operation. With cross-industry know-how and knowledge built from over 50 years in the field, we offer regulatory compliance services that help minimize risk and maintain compliance.

We work in tandem with your subject matter experts to create a program that not only meets regulatory standards, but also aligns with your organization's procedures, culture, and philosophy.

### Identify gaps in audit readiness through program assessments.

GP Strategies® assessment services assist in identifying program gaps or deficiencies that could potentially prevent your facility from passing an audit. We can provide solutions to help close gaps through a variety of consulting, training, and process improvement services.

### Facilitate hazard identification and risk analysis (HIRA).

GP Strategies can help you implement a risk-based management system by:

- Identifying all types of process risks to control, including regulatory and non-regulatory.
- Identifying when HIRAs should be performed for all stages in a project and a facility's lifecycle.
- Identifying what types of HIRAs to perform.
- Facilitating process hazard assessments (PHAs).

### Ensure up-to-date documentation to support processes and procedures.

Our experienced personnel can work with your subject matter experts to develop and update documentation, including the following:

- Regulatory Program Procedures and Processes
- Operating and Maintenance Procedures
- Job Aids
- Training Manuals
- Process Safety Information and Safety and Environmental Information
- Mechanical Integrity Documentation

### Our regulatory and compliance solutions include the following:

- Compliance Assessments and Audits
- Regulatory Program Development and Implementation
- Process Hazard Analysis and Risk Assessment
- Process Safety Information Development
- Training Development and Implementation
- Operational Discipline Based on Procedures and Qualification
- Procedure Development and Revalidation
- Mechanical Integrity Services

## Ensure compliance with well written, comprehensive procedures.

Achieving compliance is difficult without well written, comprehensive procedures. GP Strategies can bridge the gap and assist you with developing a conduct of operations based on an operational discipline. It is essential that your operational discipline is based on comprehensive operating procedures and ensures that your operators are trained and qualified to perform their job functions safely and effectively.

## Ensure your workforce is trained and qualified to perform their job duties through a structured process.

Our subject matter experts work with you to create programs that will keep your organization in compliance while maintaining safety and cultural values. We do this by:

- Reviewing and Revising Current Qualifications Processes
- Developing a Competency Model
- Updating and Developing Procedures and Training
- Implementing Training Programs

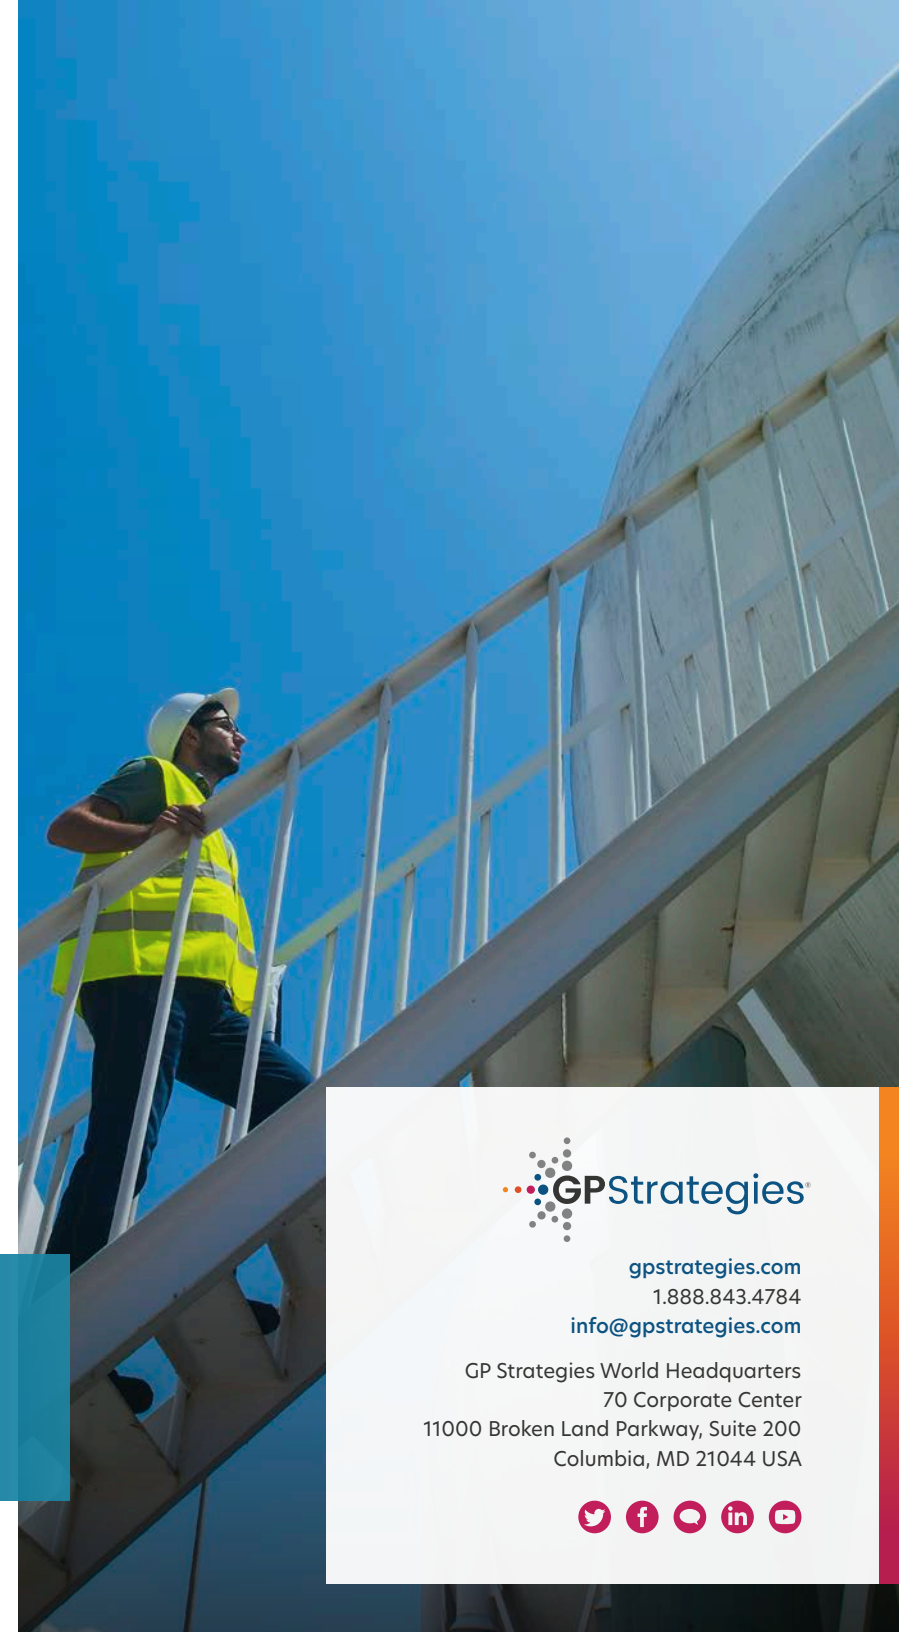

## Make sure your assets are properly maintained through a mechanical integrity program.

GP Strategies develops mechanical integrity programs to ensure your assets are installed and maintained properly, as well as to ensure the reliability of critical assets. Our services include the following:

- Asset Integrity and Reliability Strategy Establishment
- Risk Assessment and Ranking
- Inspection, Testing, and Preventive Maintenance (ITPM) Plan Development
- Quality Assurance Program
- Equipment Categorization
- Reliability Centered Maintenance

• • • Partner with us to **scale and enhance** your regulatory and compliance efforts.
